<https://github.com/ashramzan>

I am a hardworking and conscientious individual, eager to learn and looking to develop and further my skills in a fast-paced environment. Worked with a variety of technologies, most recently in AWS and .NET during my graduate programme. Important to add I studied Medicine for 4 years following my software degree before due to circumstances outside of my control, I had to step away. And therein lies my determination to put theory into practice and perform for the right employer.

EXPERIENCE

NOVUS GRADUATE PROGRAMME

Capita | Remote

JUNE 2023 – SEPTEMBER 2023

Underwent a graduate programme with Capita which was designed to help further develop my skillset allowing me to start my career in software with a strong foundation. With a focus on AWS and .NET we undertook different problems and challenged ourselves to think creatively and apply our knowledge more effectively. I completed the training with an average mark of 96%. The programme included:

- Soft skills, Python programming, Linux command line.
 - Networking and Network securities, Relational Databases.
 - Aws: CloudFront, Lambda, S3, EC2, DynamoDB, Route 53, Load Balancing, Scaling.
-

PROJECTS

- Multi-User Chat Programme written entirely in C# using Visual Studio. WebForms were the GUI for the application and TCP was utilized to connect clients to the server and allow chatting to and from.
 - I successfully created a desktop application that manages records of animals using Java and a SQL database. The application features functionalities such as viewing, adding, and removing animal records, and is designed with a user-friendly graphical user interface (GUI) using JavaFX.
 - A standards-compliant and user-friendly apparel website, employing HTML, CSS, and JavaScript to serve as a foundational content management system. It integrated server-side scripting with SQL for data management and PHP for seamless database connectivity. Leveraging HTML and CSS, I designed clothing pages, enabling the display of apparel items, images, and user-friendly add-to-cart functionality. The backend was driven by SQL, housing comprehensive clothing data, including pricing and size details, skillfully presented to the end-user.
-

EDUCATION

FOUNDATION DEGREE IN SOFTWARE DEVELOPMENT

Manchester Metropolitan University

JUNE 2018

- Grade 2.1
- Modules included but not limited to: Advanced OOP, Mobile Applications Development, Linux with Admin, Database Driven Websites...
- Student Representative

SKILLS

- | | |
|--|----------------|
| • C# / .NET / .NET CORE/ ASP.NET | • Linux |
| • AWS | • Java, Python |
| • HTML, CSS, JS, PHP, jQuery, | • Git |
| • Unit Testing / Test Automation (TDD using NUnit, Selenium) | |

HOBBIES

- Volunteering at the care home and the local hospital
- Fiddling about with the latest tech. Thoroughly enjoy tearing apart computers and rebuilding.
- Cricket!
- Spending as much time as possible with my 2 cats... oh and family of course
